DETAILED ACTION

Response to Amendment

1. Independent claims 1, 9, 13, 15, have been amended. 1-16 are pending.

Allowable Subject Matter

2. Claims 1-16 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. Claims 1-8, 14, are allowable because prior art fails to teach or suggest, either alone or in combination, for *"a split low pass filter arrangement for independently low pass filtering rising transients and lengthening a fall time of falling transients in the low brightness signal to reduce adjacent pixel interdependence, wherein the split low pass filter arrangement comprises at least two low pass filters at least one of which is comprised of asymmetrically weighted taps thereby anticipating a bright-going signal and starting the bright-going signal going brighter earlier, at least one associated delay circuit, and a maximum selector circuit.."*
5. Claims 9-10 are allowable because prior art fails to teach or suggest, either alone or in combination, for *"a method for reducing adjacent pixel interdependence in a liquid crystal display...independently low pass filtering rising transients and falling transients in the low brightness signal to reduce adjacent pixel interdependence, the low-pass filter comprising an asymmetrically weighted low-pass filter."*
6. Claims 13 is allowable because prior art fails to teach or suggest, either alone or in combination, for *"the filter comprises at least two low pass filters at least one of which is*

Art Unit: 2629

comprised of asymmetrically weighted taps, at least one associated delay circuit, and a maximum selector circuit.”

7. Claims 15-16 are allowable because prior art fails to teach or suggest, either alone or in combination, for *“filtering the second video signal portion according to a first filtering rate to generate a first filtered value, and delay matching and filtering the second video signal portion according to a second filtering rate to generate a second filtered value, the second video signal portion being filtered by an asymmetrically weighted filter to adjust transition times of the pulses so as to reduce adjacent pixel interdependence.”*

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Response to Arguments

9. Applicant’s arguments in interview of 14 November 2008, with respect to claims 1-16 have been fully considered and are persuasive. The final rejection of 10 September 2008 has been withdrawn.
